

1. Vision Statement:

One of my greatest passions is watching and following sports. I have always focused much of my sporting attention to the Big Four(football, baseball, basketball, and hockey) along with tennis and soccer. I have decided to try to expand my viewing options and help educate the general public on other more obscure sports. I thus put together a website with information about the “unknown sports.”

2. Architecture design

3. User Guide:

When the website is accessed, it will bring you to the homepage which has an overview of the website. There is a nav bar which will let you explore each page for the individual sports. Each page will also have a map of where each sport originated and a like button to give that page a like.

Below is a picture of the homepage:

Unknown Sports

Welcome to Unknown Sports

[Sports](#) [Cricket](#) [Rugby](#) [Polo](#) [Lacrosse](#) [Collage](#) [Map](#)

This website highlights unknown sports. As an avid sports fan, I am researching more obscure sports to spread my viewing options when the pandemic ends.

Cricket

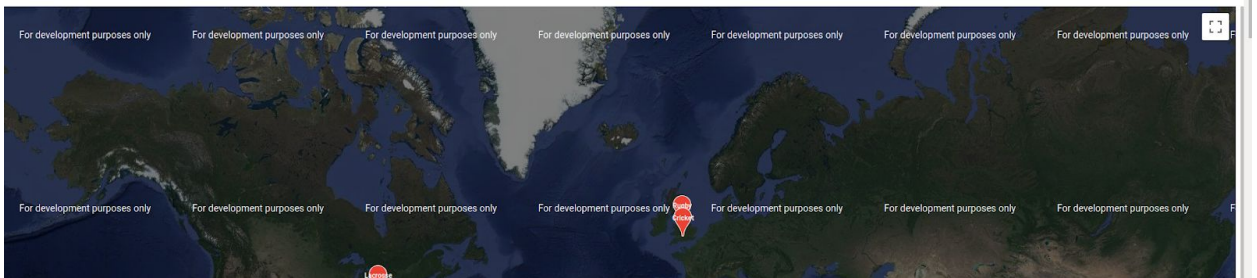

Cricket is a sport invented in England. Baseball is loosely based on cricket. The idea of cricket is to hit a pitch that is bouncing so your team can score runs. In addition, you want to prevent the ball from hitting the wicket as the batting team.

There are two special pages. One is the collage page which has a picture of all the sports combined on the page replacing the individual sport description. It also has a map and a like button. Below is the collage page:

Jnknown Sports Collage

here is a Unknown Sports Collage

The other is a page that highlights just the map. The vast majority of this page is the map. Below is a picture of the map page:

Map of origins of all the unknown sports
